

ZUMTOBEL

MELLOW LIGHT IV

Recessed and surface-mounted luminaire

Soft, vivid and reflection-free light: the daylight's double is getting even closer to its role model. Now also available as LED luminaire.

[linked](#)

All order numbers in the PDF are linked to the Zumtobel online catalogue.

Daylight is characterised by a high level of uniformity, which we perceive as natural and beautiful. That is why people feel exceptionally well in rooms that are lit according to these specifications. MELLOW LIGHT stands for a concept inspired by daylight. The room is immersed in natural, pleasant and unobtrusively bright light – with sufficient shadow detail and contrast rendering. The direct/indirect light typical of the luminaire's fourth generation is produced in closed lighting chambers, reflections are eliminated through a variety of optics. The new LED luminaire combines these tried-and-tested qualities with maximum energy efficiency and a long, maintenance-free service life.

The fourth generation

Minimalist look and reduced dimensions

Studio & Partners www.studioandpartners.com

When designing MELLOW LIGHT IV, the main objective for the team at Studio & Partners was to optimise lighting quality, yet to modernise the design appearance of the luminaire to harmonise with contemporary architecture. The luminaire unit has been reduced to translucent, almost immaterial lighting wings, thus putting the room and its architectural features to the fore. The innovative lighting chamber concept is responsible for the luminaire unit's low-profile look. This makes MELLOW LIGHT IV appear almost two-dimensional, meeting the requirements of modern office architecture for a minimalist look and reduced dimensions.

MELLOW LIGHT IV

Product range overview

Flexibility thanks to large choice of models Thanks to the introduction of the new LED models, MELLOW LIGHT IV is now a very extensive generation of daylight-based luminaires. Both the square traditional models and the slim linear versions are available as recessed and surface-mounted luminaires. The amount of light ranges from nearly 2400 lm to over 4000 lm. Thanks to high light output ratios, the twin objectives of as few luminaires as possible and maximum possible lighting efficiency can both be met. The LED models, too, are available with two light colour options: warm 3000 K and intermediate 4000 K, available in two lumen packages. The LED luminaires are DALI-dimmable, the traditional fluorescent lamp models are also available in a switchable version.

eco⁺

MELLOW LIGHT IV bears the label for especially resource-friendly products. For more information on eco+, please visit zumtobel.com/eco

Various optics

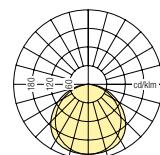

For recessed and surface-mounted luminaires

T16/TCL

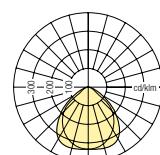

Micro-prismatic optic with cross pattern

- Maximum energy efficiency
- Gentle, ergonomically beneficial light
- Light source is hidden from direct view
- Ideal for upright and inclined displays (luminance reduced at all angles of view)
- Free arrangement in the room, without taking position of workstation into account (demonstrated by TU Ilmenau research)

Slotted sheet steel controller optic

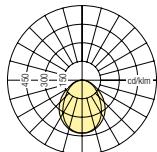

- Contemporary look with a focus on design
- Gentle, ergonomically beneficial light
- Light source is hidden from direct view
- Ideal for upright and inclined displays (luminance reduced at all angles of view)
- Free arrangement in the room, without taking position of workstation into account (demonstrated by TU Ilmenau research)

Louvre optic

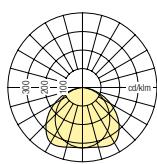

- Tried-and-tested, efficient traditional luminaire in conformity with relevant standards
- Gentle lighting effects typical of MELLOW LIGHT
- Glare control for upright displays meets specifications of EN12464 (with or without extra filter, depending on luminaire model)

LED

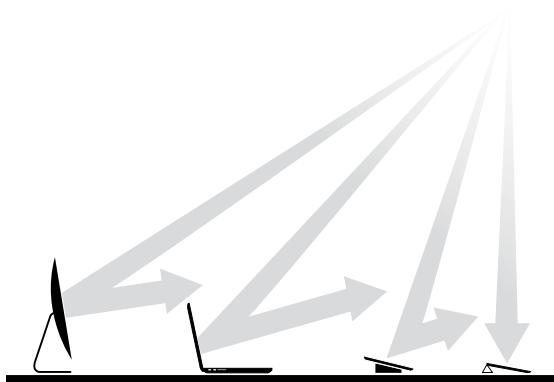

Micro-prismatic optic with cross pattern

- Maximum energy efficiency
- Gentle, ergonomically beneficial light
- Light source is hidden from direct view
- Ideal for upright and inclined displays (luminance reduced at all angles of view)
- Free arrangement in the room, without taking position of workstation into account (demonstrated by TU Ilmenau research)

Slotted sheet steel controller optic

- Contemporary look with a focus on design
- Gentle, ergonomically beneficial light
- Light source is hidden from direct view
- Ideal for upright and inclined displays (luminance reduced at all angles of view)
- Free arrangement in the room, without taking position of workstation into account (demonstrated by TU Ilmenau research)

Flat screen 40° – 90°
Laptop 0° – 40°
Display 0° – 10°
Tablet PC

Lighting of indoor workplaces

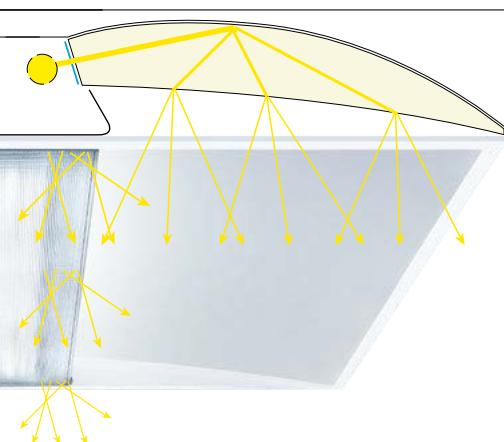

In the EN12464 standard, luminance limits are specified in order to reduce direct glare and glare from reflections on screens. In this context, specifications mainly refer to upright displays. By now, modern displays can be made glare-free to an extent that even luminance levels higher than specified by the standard do not produce irritating reflections. The situation is completely different for steeply inclined displays.

Especially for luminaires arranged directly above workstations, glare control is required at steep angles. Perfect glare control is ensured by the MELLOW LIGHT IV optics that hide the light sources from view all around.

MELLOW LIGHT IV

T16 lighting technology

With MELLOW LIGHT IV, you see only the light, and not the light source. Micro-prismatic, slotted sheet steel and controller optics protect the eye against direct view into the light source from all angles. Lighting that brightens up ceilings, walls and task areas in equal measure is subjectively perceived as more powerful than for instance purely direct lighting of comparable illuminance levels. Yet another innovative step was taken in the fourth generation of MELLOW LIGHT by applying the closed lighting chamber principle. The light is injected into the chambers laterally, scattered by the reflector and emitted to produce an opal effect. This lighting chamber concept also allows an unusually low mounting depth.

T16/TCL

T16 and **compact fluorescent lamps** are characterised by high luminous efficiency levels.

Their characteristic, visibly bright lighting effect is produced in the **lighting chamber** by a high degree of scattering.

Optics hide the light source from view,
only the light is visible.

MELLOW LIGHT IV

LED lighting technology

Even efficient LED technology makes use of the tried-and-tested stylistic idiom of a reduced luminaire unit with translucent, almost immaterial lighting wings. Zumtobel has incorporated lighting know-how from the MELLOW LIGHT V LED luminaire range into the MELLOW LIGHT IV range. The light emitting diodes have been fitted inside the luminaire unit and ensure uniform lighting at the workstation. With a luminaire efficiency factor of up to 104 lm/W and very low maintenance efforts, MELLOW LIGHT IV delivers the right arguments for switching to LED technology.

An innovative **high-performance reflector** made of micro-cellular plastic covers nearly the entire inner surface. A reflection factor of 99% ensures that absolutely no light is lost inside the luminaire.

104 lm/W

LED

The **LED light source** has a service life of 50,000 hours at 75% residual luminous flux.

The LED light points are resolved perfectly by the **primary optic**.

Micro-prismatic and slotted sheet steel controller optics protect the eye against direct view into the light source from all angles.

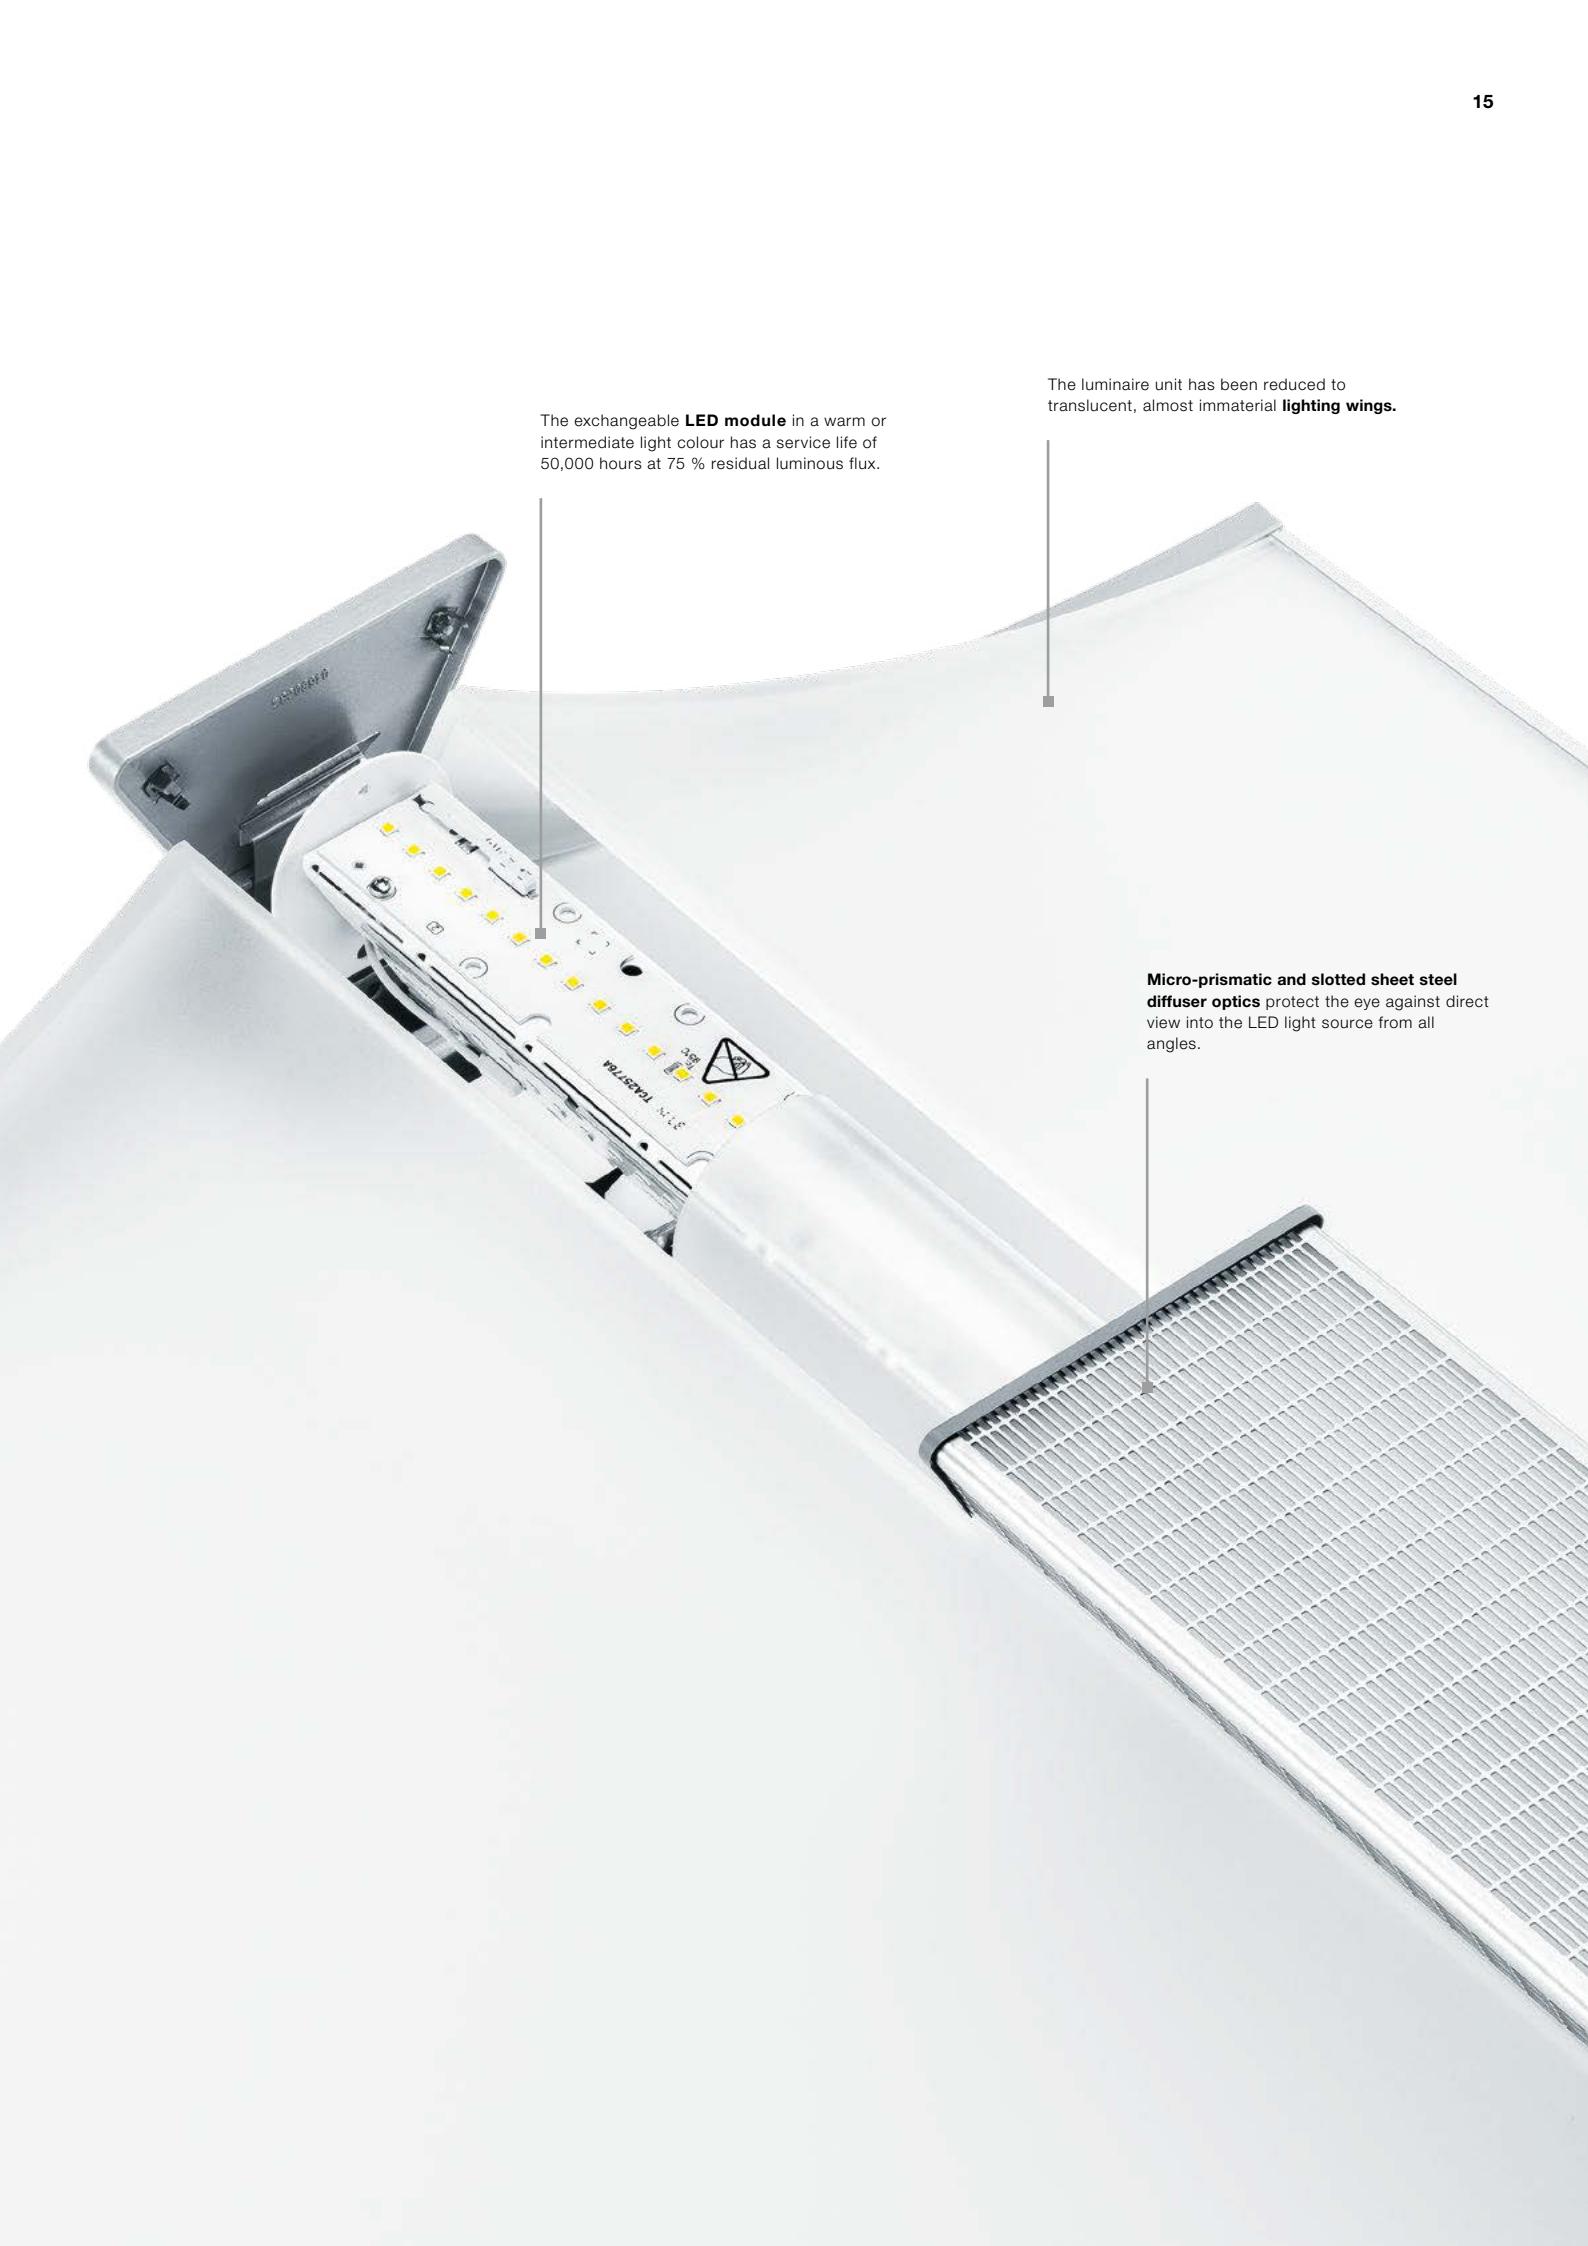

MELLOW LIGHT IV

Surface-mounted luminaire featuring LED lighting technology

LED technology has now also found its way into the fourth generation of this surface-mounted luminaire. The square version with its pared-down luminaire unit and translucent, almost dematerialised lighting wings is fascinating. LED technology introduces an exciting, yet restrained effect to rooms and architectural structures. The LED module integrated along the centre line of the luminaire unit, combined with MPO+ micropyramidal optic and diffuser optic, provides for a pleasant lighting situation.

86 lm/W

LED

The exchangeable **LED module** in a warm or intermediate light colour has a service life of 50,000 hours at 75 % residual luminous flux.

The luminaire unit has been reduced to translucent, almost immaterial **lighting wings**.

Micro-prismatic and slotted sheet steel diffuser optics protect the eye against direct view into the LED light source from all angles.

Installation of MELLOW LIGHT IV

Easy to install, easy to maintain

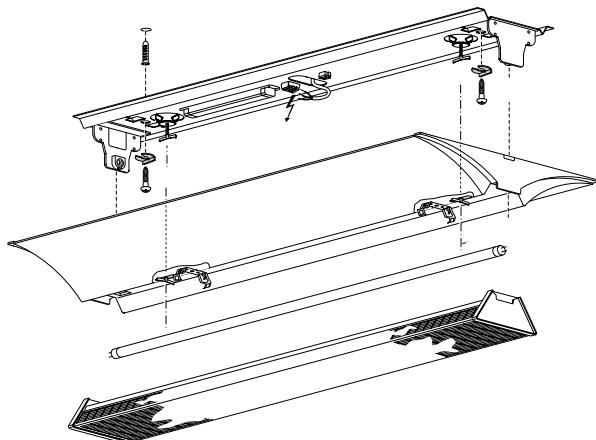

Recessed luminaire

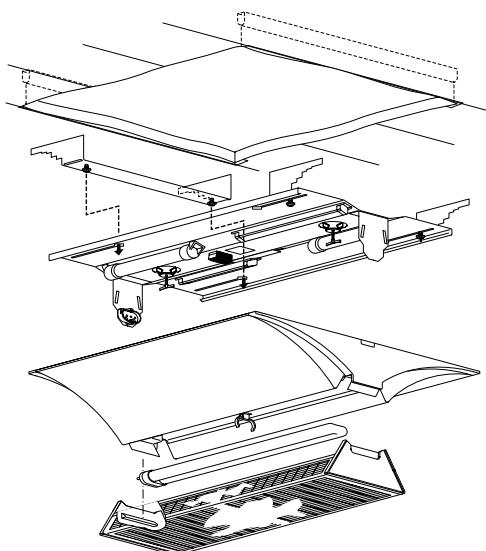

Lay-in luminaire

Surface-mounted luminaire

Surface-mounted luminaire
for suspended ceilings

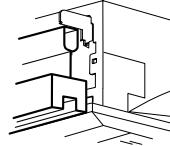

In order to brighten up the ceiling even more, the square recessed version of the MELLOW LIGHT IV luminaire can be integrated into a suspended ceiling by means of accessories and installed as a recessed luminaire.

When developing the MELLOW LIGHT product range, we put a special focus on the needs of electrical installers and service engineers: the luminaire is quick and easy to install and maintenance is made easier, either because of straightforward relamping in case of conventional light sources or due to the LEDs long service life.

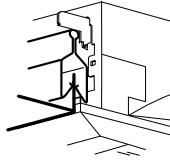

Flexible integration into the ceiling

The way a luminaire is integrated into a ceiling system plays a major role in every interior. The flexibility of MELLOW LIGHT IV and the luminaire's straightforward installation into a variety of ceiling systems were decisive factors for the success of the product range.

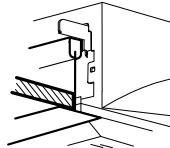

SAS Alugrid 15/16 600 x 600

The Alugrid-Q system features completely flush tiles and a continuous threaded recess. When combined with MELLOW LIGHT IV, the ceiling appearance is particularly neat.

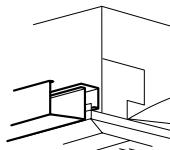

Sprung T Omega system

In typical Sprung T Omega concealed ceiling systems, MELLOW LIGHT IV replaces a tile, giving a tight butt finish to the adjacent angular/bevelled-edge tile.

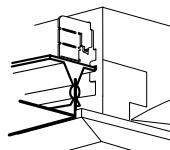

Standard lay-in systems

MELLOW LIGHT IV integrates well with lay-in T systems. Optionally, the luminaire can be pulled up to the underside to achieve a straightforward effect revealing the finished edges, or it can be flush-mounted.

SAS 330 1200 x 300

Whether in linear or tartan grid format, MELLOW LIGHT IV can be integrated superbly into the SAS 330 system for a completely flush appearance (using either end or side supports).

Sprung T Burgess

MELLOW LIGHT IV versions specifically designed for Sprung T Burgess ceilings have reduced body dimensions to avoid wide main bearers, while still retaining a neat flush appearance and working well with both angular and bevelled-edge tiles.

Refurbishment of a team office

MELLOW LIGHT IV LED compared with conventional louvre luminaires

Although slightly higher investment costs have to be factored in for MELLOW LIGHT IV LED initially, refurbishing an existing lighting system incorporating louvre luminaires pays for itself after just 4 years. This is explained by its low energy and maintenance costs. Additional efficiency can be obtained by using a lighting control system such as LITECOM. Presence detectors and daylight sensors effectively reduce the need for artificial lighting and improve convenience at the same time. With average energy consumption of only 9 kWh per year, MELLOW LIGHT IV LED is recommended for buildings where sustainability certification is required.

Underlying conditions

Conventional T26 luminaires
15 T26 louvre luminaires, each 4 x 18 W
Luminous flux of luminaires: 3024 lm
Luminous efficiency of luminaires: 34 lm / W

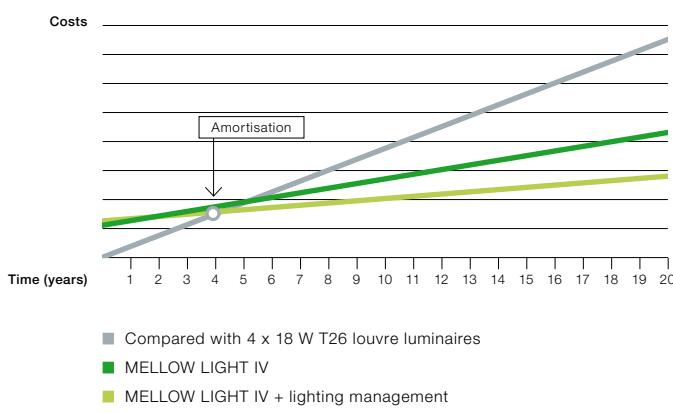

LED luminaires
15 recessed MELLOW LIGHT IV LED 37 W luminaires
Luminous flux of luminaires: 3780 lm
Luminous efficiency of luminaires: 102 lm / W

Lighting management system

[...] Shared properties MELLOW LIGHT IV

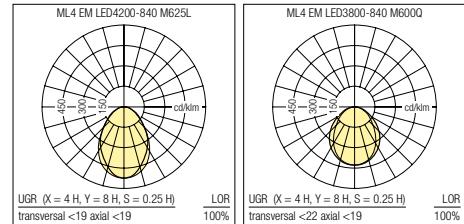

- LED ceiling-recessed luminaire for general and task area lighting
- Recessed housing made of sheet steel with die-cast structure
- Colour temperature 4000 K (NW: neutral white). 3000 K (WW: warm white) optional
- Colour rendering index CRI Ra > 80 for office applications
- LED service life: 50 000 h before luminous flux is reduced to 90 % of the initial value
- Chromaticity tolerance between multiple luminaires of up to 3 MacAdam ellipses
- Lighting chamber made of high-purity PMMA diffuser pearl material
- Suitable for glare control for upright and tilted displays
- Luminaire pre-wired using halogen-free leads
- Mounting kit is needed for concealed carrier systems and sawn cut-outs
- "Dimmable DALI" luminaires are fitted with a DALI-controllable electronic ballast

MELLOW LIGHT IV LED EM optic microprisms

- [...]
- Optic fastened without use of tools
- Microprismatic optic with precise patterning for directional light distribution with all-round glare control for maximum efficiencies

[...] Shared properties Mellow light IV

- Surface-mounted housing made of sheet steel with die-cast texture
- Lighting chamber made of high-purity PMMA diffuser pearl material
- High luminaire efficiency of up to 88 lm/W
- Colour temperature 4000 K (neutral white) and 3000 K (warm white)
- Colour rendering index CRI Ra > 80 for office applications
- Chromaticity tolerance between multiple luminaires of up to 3 MacAdam ellipses
- LED service life: 50 000 h before luminous flux is reduced to 90 % of the initial value
- Luminaire pre-wired using halogen-free leads

MELLOW LIGHT IV LED AM optic microprismatic

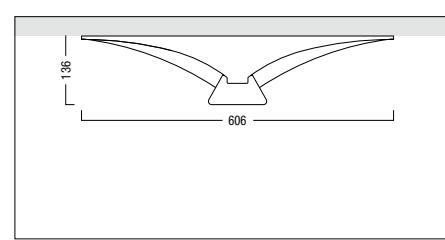

- [...]
- Optic fastened without use of tools
- Microprismatic optic with precise patterning for directional light distribution with all-round glare control for maximum efficiencies
- Suitable for glare control for upright and tilted displays

Zumtobel, a company of the Zumtobel Group, is an internationally leading supplier of integral lighting solutions for professional indoor and outdoor building lighting applications.

- Offices and Communication
- Education and Science
- Presentation and Retail
- Hotel and Wellness
- Art and Culture
- Health and Care
- Industry and Engineering
- Façades and Architecture

We provide unique customer benefits by integrating technology, design, emotion and energy efficiency. Under the Humanergy Balance concept, we combine the best possible ergonomic lighting quality for an individual's well-being with the responsible use of energy resources. The company's own sales organisations in twenty countries, as well as commercial agencies in fifty other countries, form an international network of experts and design partners providing professional lighting consulting, design assistance and comprehensive services.

Lighting and sustainability

In line with our corporate philosophy "*We want to use light to create worlds of experience, make work easier and improve communications and safety while remaining fully aware of our responsibility to the environment*", Zumtobel offers energy-efficient high-quality products, while at the same time making sure that our production processes based on the considerate use of resources are environmentally compatible.

zumtobel.com/sustainability

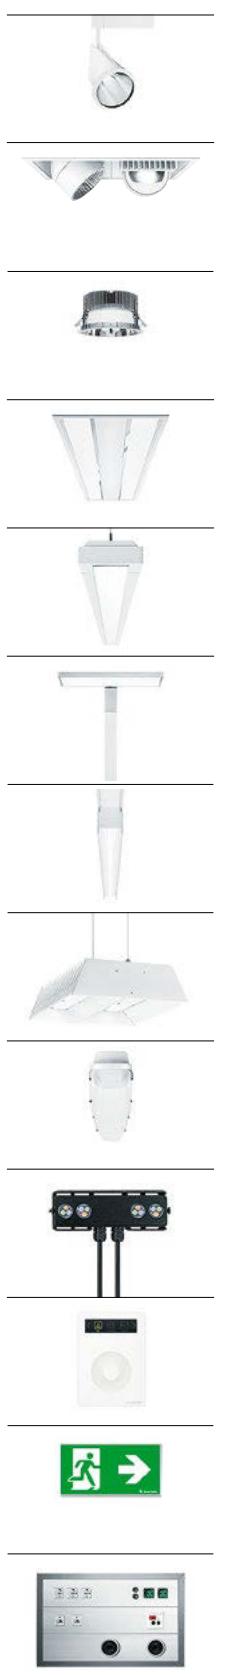

Top quality – with a five-year guarantee.

As a globally leading luminaire manufacturer, Zumtobel provides a five year manufacturer's guarantee on all Zumtobel branded products subject to registration within 90 days from the invoice date and in accordance with the terms of guarantee at zumtobel.com/guarantee.

EN 06/2015 © Zumtobel Lighting GmbH
Technical data was correct at time of going to press.
We reserve the right to make technical changes without notice. Please contact your local sales office for further information. For the sake of the environment: Luxo Light is chlorine-free paper from sustainably managed forests and certified sources.
